2023-09-28

THE DATASET WE USE stems from the Bank of England Research datasets.

FOR THIS DATASET the Bank of England asked 220.846 people for their opinion on the **perceived and expected inflation**. The survey has run quarterly since 2001.

I quote:

This dataset contains the individual responses to our Inflation Attitudes Survey, a quarterly survey of people's feelings about inflation and other economic variables like the interest rate.
